

U-SLOPE

A reading and writing slope with U in mind.

The unique design of the U-Slope transforms from a document holder into a reading and writing slope by simply gliding forward over the keyboard. For reading, raise the slope and relax back into your chair. When you are ready to use the keyboard again, glide the U-Slope back into its document holder position.

Freely position your documents to any angle to prevent awkward neck movements and promote good posture. Your papers are placed directly in front of you, so you can type on your keyboard and write at the same time without reaching and twisting.

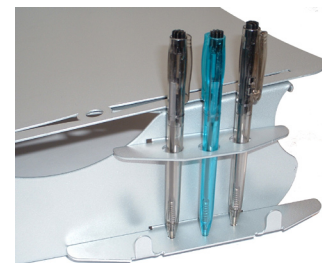

The U-Slope unclutters your desk by combining many functions into one compact multi-purpose unit. Adjusts in an instant into a bookstand, writing slope, document holder, or laptop stand.

- High-strength precision-cut steel with a durable powder-coat finish.
- Adjustable slope with 6 angles for reading and writing up to 45°.
- Full clearance above the keyboard, so you can freely glide the U-Slope forward for reading/writing and backward for keying. Accommodates ergonomic keyboards and wrist supports.
- Optional non-slip pad (included) transforms the U-Slope into a rigid reading and writing slope.
- Removeable bottom lip for viewing large documents and media (e.g., blueprints, x-rays).
- Optional line guide facilitates reading of detailed data.
- Reading/writing surface supports file folders, books, binders and documents. Magnetic document holder.
- Suitable for both left- and right-handed users.

In two sizes:

Standard 20.1" x 12.6"
Mini 15.0" x 12.6"

Two interchangeable bottom lips convert to pen and pencil storage.
